

Name: _____

Grade 2

Teacher: _____

Date: _____

Operations SNAP

Equation: _____

$$48 + 25$$

Estimate or Guess

$$50 + 25 = 75$$

48 is close to 50
so I will use that number
because its a friendly
number.

Show one way to solve the equation:

$$\begin{array}{r} 48 + 25 \\ \wedge \quad \wedge \\ 40 \ 8 \ 20 \ 5 \end{array}$$

Split 2
or
decompose 2

$$40 + 20 = 60$$

$$8 + 5 = 14$$

$$60 + 10 + 4 = 74$$

first I added tens, then
ones

Show another way to solve the equation:

$$48 + 25 = 73$$

I used an open number
line to count on in chunks.

Draw or write a real-life example or a math story or problem using the equation above:

A baker made 48 muffins. He baked 25 more. He made 73 muffins
altogether.
